

INDEX

PRAC. NO.	AIM OF EXPERIMENTS	DATE	PAGE NO.	SIGNATURE OF TEACHER
1.	Introduction to experimental pharmacology		1-3	
2.	Study of laboratory animals		4-6	
3.	Commonly used instruments in experimental pharmacology		7-19	
4.	Different routes of administration of drugs in animals		20-22	
5.	Types of pre-clinical experiments In-Vivo In-Vitro,Ex-Vivo etc		23-25	
6.	Techniques of blood collection from animals		26-31	
7.	To study the various drug on rabbit eye to check meiosis and mydriasis effect		32-33	
8.	Effect of analgesics using Analgesiometer		34-37	
9.	Study of analgesic activity by writhing test		38-39	
10.	Screening of anti-convulsant using Electro Convulsimeter		40-44	
11.	Screening of Muscle relaxants using Rota-Rod apparatus		45-46	
12.	Screening of CNS stimulants and depressants using Actophotometer		47-48	
13.	Study of anxiolytic activity using elevated plus maze method		49-50	
14.	Study of effect of drugs on isolated heart		51-54	
15.	Effect of drugs on ciliary motility on frog's buccal cavity		55-57	
16.	Pyrogen testing by rabbit method		58-60	
17.	MULTIPLE CHOICE QUESTIONS		61-62	
18.	QUESTIONS		63-74
